## Irrigation system repairs underway, final phases of project and site restoration beginning

January 2020

Residents, property owners and all stakeholders,

We thank you for your ongoing patience and sincerely appreciate your cooperation during the force main installation work. Below is an update on recent work progress and what to expect moving forward.

Collier County's contractor, Quality Enterprises USA, Inc., (QE) recently restored the irrigation system at Palm Drive and Glades Boulevard as well as parts of the surrounding area. These efforts remain ongoing in various locations throughout the project limits. Final phases of construction with site restoration are also underway. QE is required to restore the area to pre-construction state by project completion, which is currently projected for the first quarter of 2020. QE and the County will be working closely with impacted communities and property management companies throughout this process.

***Please note construction timelines are fluid and often evolve throughout the life of a project. The projection above should not be considered final. We will do our best to keep you informed throughout the remainder of the project.***
