

Palm River Public Utilities Renewal Project

April 20, 2023

Dear resident:

The Palm River Public Utilities Renewal (PUR) project started construction in mid-March in Area 1 to replace the existing water main. The water main pipe installation is nearly complete in Area 1 and the contractor will soon begin water main individual connections.

Our records show that we have not received your Right of Entry form allowing the contractor to connect water and/or wastewater services to your house at no additional cost to you. **If Collier County Public Utilities does not receive your executed Right of Entry form, the property owner will be responsible for hiring a licensed plumber to make the connections to the county's new systems.**

Please contact the project public information consultant for the Palm River PUR project at 239-227-4172 or email to PalmRiverUtilities@colliercountyfl.gov as soon as possible so we can coordinate getting your Right of Entry form or answer any questions that you may have regarding this work.

Cordially,

Diana C. Dueri, PMP
Project Manager III
